Environmental Chamber and Heavy Table for the PCC-300 Post-CMP Cleaner and Tribometer

Environmental Chamber and Heavy Table Details

- Made by Araca, Inc., Tucson, AZ USA.
- Brand new add-on product to our PCC-300® PVA system.
- Footprint is only 91 × 91 cm.
- Made of a sturdy steel frame structure (powder-coated to the color of your choice) with 5-mm thick Lexan® PC sheets all around (top and all 4 sides).
- Large access windows and doors from all 4 sides (with steel hinges and handles).
- 10-cm exhaust port through the top.
- Integrated 38-cm thick heavy 1-piece granite table that supports the PCC-300®.
- Integrated secondary bottom plate (with secondary spill containment) that supports chemical delivery system(s).
- Independent leveling capability for the granite table and the entire assembly.
- Integrated lockable and foldable steel workstation that contains and supports the PC needed for data capture and analysis without adding additional footprint to the system.
